Powerpoint with Scripted Outline

## A POWERPOINT PRESENTATION FOR DISTRIBUTORS

This CD ROM contains a 22-slide PowerPoint presentation about the company XanGo, business and product. This presentation is something that any distributor can use to explain more about XanGo to other people. A great tool for those getting started!

Available at [www.X1Tools.com](http://www.X1Tools.com)

I get asked, after virtually every presentation I have given across the country, for a copy of my PowerPoint when I am done presenting. To meet the demand that has been repeatedly expressed for a multimedia presentation I have created this outline and the accompanying arrangement to aid in the spreading of the XanGo™ story. Each slide is scripted in the presentation to help you get started in "presenting". You will find information that delves into specifics on each topic in the arrangement. Do not be concerned with including all of what you read, you'll start using your own

story. Instead, familiarize yourself with the contents and take from it what you relate best to.

I wish you the very best of luck in developing your skills as a speaker. Speaking was not easy for me and did not come naturally. Hopefully some of what I have learned shines through in this new tool.
